Dear Christine,

We refer to our WhatsApp conversation earlier today.

Please find in this email our WABA integration document for your reference.

This integration document covers both inbound and outbound messaging features as discussed.

We will schedule for a session of technical alignment to go through this document next week when you are available.

Thank you.

Best regards,

Dang Tin Wai

Dear Tin Wai,

Thanks for the great sessions.

Based on our sessions, these are the following items:

- Test account information
- Documentation
 - Authentication
 - Template Management API
 - Facebook Template Sync API
 - Send Business Initiated Message API
 - Sample for attachment template
 - WebHook Management API
 - WebHook API
 - Send User Initiated Message Reply API
 - Every API limitation, load, error code / messages
 - Sample error response
 - Postman Collection for API if available :)

Feel free to contact me if you have any questions.

Best Regards

Zeying

Good morning Tin Wai,

Do let us know if we need to provide additional information before we can start testing the Whatsapp API.

Otherwise, look forward to getting the information/instructions needed for us to start testing ASAP.

Cheers!

Kin Chuen

Dear KC, Christine and team,

Many thanks for your prompt email update below.

I have looped in my colleagues @Marcus Lee and @Alwyn Khiu who were in the tech alignment call earlier this week, to assist further.

Dear team,

I believe we have all the required details to begin with integration work/ facilitation work.

Do list in this email if there is anything else we require.

Best regards,

Dang Tin Wai

Hi Team, got the business approval. Thanks for the fast response.

Hi Team, your phone number is currently tagged with other provider or had been registered as Whatsapp Business in apps?

During the integration, Facebook is showing this message which as to remove the current Whatsapp Account 1st.

Connect phone number

To connect a phone number to send messages to your customers:

1. Download the certificate or copy it to your clipboard
2. Follow [these instructions](#) to confirm your number

Display Name: BillOne Technology Sdn Bhd

Cannot Create Certificate

This number is registered to an existing WhatsApp account. To use this number, disconnect it from the existing account. Then, return to this page and re-enter the number. Note: It may take up to 3 minutes for the number to become available. [Learn more](#)

Dear Alwyn,

Please find the following missing from the integration documentation:

- Template Management API
 - We can use the API to create / update / delete template without going through facebook business manager
- Send Business Initiated Message API
 - Sample for attachment template
- WebHook Management API
 - Sample for API for edit or remove webhook
- Every API limitation, load, error code / messages
 - Sample error response
- Postman Collection for API if available :)

Best Regards,

Zeying

Hi Zeying, sorry for the delay due to mc yesterday.

- Template Management API
 - Prefer to go through Facebook Manager because Meta update their Facebook Manager 1st then after sometime only update the API
- Send Business Initiated Message API
 - Sample for attachment template
 - This required to create a template message in your facebook business manager only able to
 - {

```
"whatsappId": "<Whatsapp GUID>",
"to": "<phone_number>",
"name": "<template_name>",
"language": {
  "code": "en"
},
"component": [
  {
    "type": "header",
    "parameters": [
      {
        "type": "<image|document|video>",
        "value": "<url>"
      }
    ]
  }
]
```

```
]
}
```

- WebHook Management API
 - `curl -X 'DELETE' \`
`'https://nubitel.app/api/ThirdPartyWebhook/<WhatsApp Guid>' \`
`-H 'accept: */*' \`
`-H 'Authorization: Bearer <Token in Step 1>'`
- Every API limitation, load, error code / messages
 - <https://developers.facebook.com/docs/whatsapp/cloud-api/support/error-codes/>
- Postman Collection for API if available :)
 - <https://nubitel.app/swagger/index.html>

Thanks. Regards.

Hi Alwyn,

Thanks for your email. Hope you are recovering well.

On template management, I would like to understand more clearly. The reason for this is because we have use cases where we need to manage whatsapp templates (create, update, delete) from our SaaS application and we need to understand the feasibility of this at this time.

Q1: When you say prefer to go to facebook manager, it means we can manage whatsapp templates for this account via meta's APIs?

Q2: "Prefer" means can we still go through nubitel.app's APIs to manage templates? What are the differences/impact if we take this route? Asking this because I saw some template related APIs in the swagger link you shared.

Regards,
Kin Chuen

Hi Kin Chuen,

Q1: When you say prefer to go to facebook manager, it means we can manage whatsapp templates for this account via meta's APIs?

Answer: Not using Meta API, using <https://business.facebook.com/> which is Facebook Business Manager user interface.

Q2: "Prefer" means can we still go through nubitel.app's APIs to manage templates? What are the differences/impact if we take this route? Asking this because I saw some template related APIs in the swagger link you shared.

Answer: Yes, u can use nubitel.app API. Attached the documentation in this email. However, u might face some template is not able to submit when facebook updated the user interface and not updating the API.

Thanks. Regards.
